

DAY 1-MARCH 23rd 2023

RAXONE
idebenone 150mg tablets

A ray of hope
for people with Leber's Hereditary
Optic Neuropathy (LHON)

Chiesi
global rare diseases

EYLEA
(afibercept solution for injection)

**EYLEA PFS
WITH THE TWIST**

Ozurdex
bimatoprost intravitreal
implant 0.7mg

Timing is everything

WHY TIMING IS CRUCIAL?

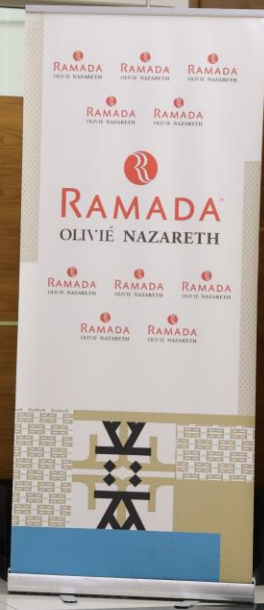

1/3rd of DME patients are
insufficient responders

or edema may
lead to changes in

EYLEA
aflibercept 4mg

with the twist

EYLEA PFS WITH THE TWIST

ANTI-VEGF
AND
UVEITIS PATIENTS

Asaf Bar

JIA -related Uveitis Treatment Guidelines

- Topical steroids
- Chronic immunosuppressive
• 1- low-dose systemic
• 2- low-dose systemic immunomodulation
- Keep systemic therapy for 2 years* (clinical activity before attempting tapering)
- Communication with pediatric rheumatologist
- Pediatric Ophthalmologist/low-dose specialist/ocular care

In children it is important to exclude both inflammatory and non-inflammatory mimics

- Brain MRI
- Lumbar puncture
- Antibodies

21°C 90%

RAMADA

BACKGROUND

- ▶ Incidence 4.3/100,000
- ▶ Prevalence 27.9/100,000
- ▶ High rate of chronic disease
- ▶ Non-infectious uveitis
 - ▶ 69-85% of childhood uveitis
 - ▶ JIA-associated uveitis: 41- 47%

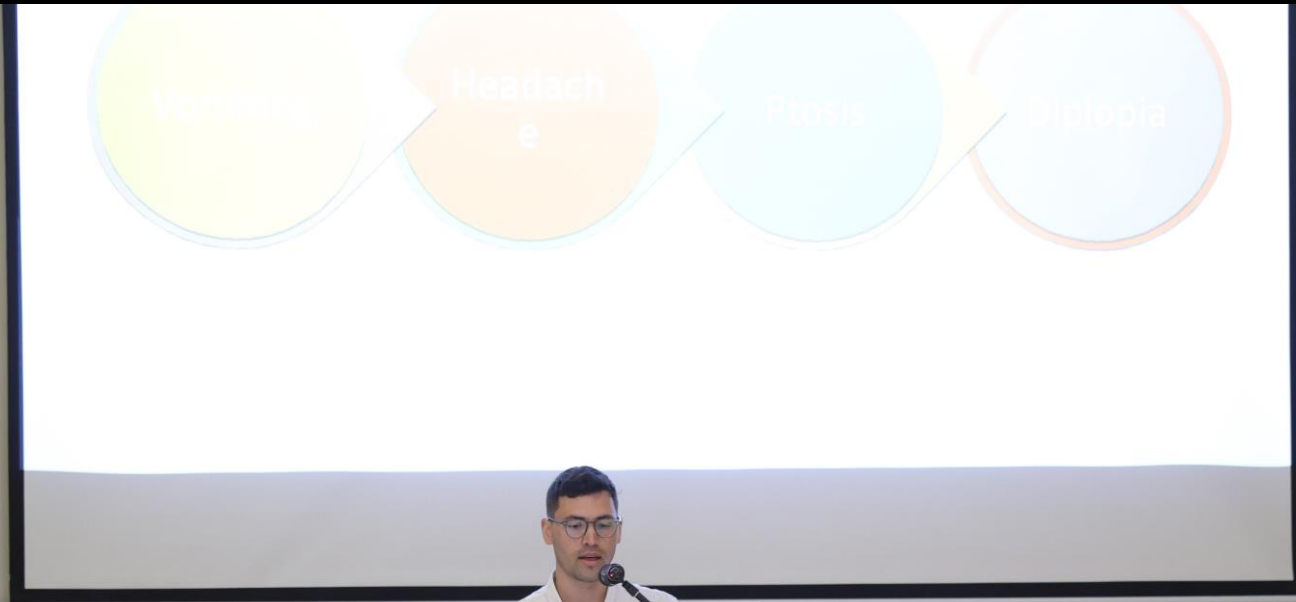

Methods

- Retrospective review
- One medical center
- Over 10 year period
- All patients ≤ 16 years

RAMADA
OLIVIÉ NAZARETH

- Invox was launched on the Australian Stock market in July 2019 and Professor Sinclair is its Chief Scientific Officer.
- Invox is currently pursuing an international phase 3 trial, IIH-EVOLVE for Presendin (a proprietary reformulation of exenatide) in patients with IIH.

DAY 2-MARCH 24th 2023

Long term treatment protocols are required for
Rheumatoid Arthritis Rheum. 2019; 2019; 104: 104-104

RAMADA
OLIVÉ NAZARETH

RAMADA
OLIVÉ NAZARETH

Ozurde

- Was approved by the Ministry of Health
- Treatment of inflammation
- Unlike other drugs, has minimal side effects

• Local safety

• Systemic safety

• Corticosteroids

• Others

• Malignancy

RAMADA
OLIVIE NAZARETH

Professor. Arnon Karni

- Director of the Neuroimmunology and Multiple Sclerosis
- Neuroimmunology Research Laboratory
- Of the Neurological Institute, Brigham Young University Medical Center
- Fellowship at Brigham and Women's Hospital, Harvard Medical School, Boston
 - Studied the immunological basis of multiple sclerosis
- After his return to Israel
 - Established the neuroimmunology laboratory at the Hebrew Medical Center
 - Continued research on the reparative and immunoregulative potential in multiple sclerosis
- TODAY:
 - multiple sclerosis, myasthenia gravis, amyotrophic lateral sclerosis, neurovasculitis, neurosarcooidosis, neurobehcet, Susac's syndrome and more
- Prof. Karni has received research grants on the subject of:
- Drug developments for oligodendrocyte regeneration and re-myelination
- Disclosure:
 - consulting or lectures from Novartis, Medison Pharma, Merck-Serono, Roche, Neopharm, Teva, SanofiAventis and Bristol Myers Squibb.

SanofiAventis and Bristol-Myers Squibb

RAMADA
OLIVÉ NAZARETH

- Primarily all members are aged 20-40 yrs. in 12
- Affiliated with various organizations
- Strongly committed to the community
- Many members are active in their respective fields

- s/p normal vaginal ...
- Denies Alcohol/drugs/smoking
- POH:
 - BE High myopia - 8D OU s/p LASIK - 2020
 - Ocular herpetic infection in childhood

RAMADA
OLIVIE NAZARETH

CASE PRESENTATION, OCTOBER 2021

- L.A., 29 YOF, born in UK
- E/R: LE blurry vision 1 day

- POH
 - BE myopia
- PMH
 - Hypercoagulability (protein C def., familial) Dx 2014
 - 2017 DVT, Tx with Apixaban 2.5MG*2 / Enoxaparin in pregnancies
 - Thrombocytopenia

Dr. Dahlia Palevski, Dr. Orly Gal-Or, Dr. Michal Schaap,
Prof. Michal Kramer and Dr. Yael Sharon

Patient Presentation

- 67-years-old woman
- PMH
 - HTN
 - Diabetes
 - Intracranial Atherosclerosis & infarcts
- Hospitalized to undergo MI stenting
- No POH
